PREFACE

The annual Bibliography of Doctoral Dissertations reports researches completed at Indian universities during the year. The present volume records 2,817 theses accepted for doctoral degrees in Social Sciences and the Humanities during the year 1983-84. Suggestions for the improvement of the Bibliography are welcome.

CONSPECTUS

This bibliography lists 2,817 theses accepted during the year 1983-84 by the Indian universities for doctoral degrees in the subjects of Social Sciences and the Humanities. These have been classified by the Dewey Decimal Classification (19th Edition) and this governs their general arrangement.

Each entry lists detailed particulars about the theses in the following order : Serial number, name of the scholar, title of the thesis, name of the university/institute, the years when research was begun and completed, availability note and name and complete address of the guide. Unless otherwise stated immediately after the title, the theses have been accepted for award of Ph.D. degree.

In case where the title of the thesis is given in a language other than English, the same has been transliterated in English and the original language of the title is given in parenthesis after the title. Abbreviations have been used to render the names of the various universities/institutes and a complete list of these abbreviations and their expansions follows the Alphabetic Subject Index. Name of the department in which research was conducted, if other than the subject under which the entry has been listed, is given in parenthesis after the name of the university. For theses, where the information about the year when the research was begun was not available, only the year of award of the degree has been given. Availability Note provides information about the availability of the theses for consultation and use by the research scholars. Unless indicated by an asterisk to the serial number, a copy of the thesis listed is available in the respective university/institute library. The thesis is available in university/institute office when the

serial number is marked by an asterisk. As regards the guides under whom research has been conducted, information has been provided in the majority of the cases. However, where complete address was not available, we had to be content with the name of the guide only. There are however a few cases where even the name could not be ascertained.

An alphabetic subject index and a scholar index are included to facilitate reference. The scholar index is arranged alphabetically according to the surnames of the scholars. But an important departure from strict alphabetization consists in grouping the surnames pronounced alike. For instance, Misra and Mishra are grouped together and these are arranged in the alphabetical order of their initials. The index directs the user to the text with the help of the running serial number of the entries.

The following statistical table gives the university and subject-wise distribution of the theses accepted in the year 1983-84.
